

## **SENIOR PHP DEVELOPER. VILNIUS, LITHUANIA**

Alright, so the story goes like this - 6 years ago there was a small team, who wanted to change the how aviation software market is established. We started with different concepts, tried out those in real operations and now we know, that we created something big, beautiful, and really cool with the help of AI, VR and other R&D things. So now, we are going forward and devoting our efforts in Sensus Aero, that we and users believe in, and going into the whole world. You may ask - what we have created? Currently we have a large ERP system with mobile applications specifically designed for aviation, which significantly helps the users and the business to thrive. What are our plans? We want to go beyond and continue expanding our ERP until it covers every business unit, and we have one true "All-in-one "software".

### **Main functions and responsibilities:**

- Participate in the entire software development lifecycle, from analyzing and implementing business requirements to coding and deployment.
- Provide guidance on the architecture of our IT products, ensuring they align with best practices and meet the agility required by our business.
- Collaborate with cross-functional teams to expand our ERP's capabilities and enhance user experiences.
- Establish and maintain high software quality standards within the team by promoting good practices and habits.
- Foster proactive engagement, communication, and collaboration with fellow team members and stakeholders.

### **Requirements for the position:**

- Thrive in a hands-on coding role while having the ability to envision the bigger picture.
- Possess 4+ years of extensive experience in product development within a PHP environment.
- Demonstrated success in working on diverse projects.
- Technical Skills: Proficiency in PHP (Symphony), MySQL, and Doctrine ORM (Knowledge of other technologies is a plus.)
- Message Queueing (RabbitMQ) - Proficient in English communication.

### **What we give in advance:**

- Opportunity to work with innovative IT solutions for the aviation market;
- International work environment;
- Additional health Insurance after a probation period;
- Learning and development opportunities to further improve your skills;

- Gym in the office;
- Employee events;
- Employees' referral bonus;
- Possibility to work remotely;
- Indoor dining room;
- Perks.It benefit;
- Child's room in an office;
- Partnership discount system for cooperating companies.

Salary: from 4958 € to 6000 € (brutto)

---

Sensus AERO is an IT company that creates smart tools for aviation business management. Sensus AERO products fall into two categories of ERP (enterprise resource planning) software for the management of MRO and Ground Handling/Airport business lines and operations.
